

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique visual representation of a 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string.

A large grid of 12 rows and 12 columns of black dots on a white background. The dots are arranged in a sparse, abstract pattern, with some rows having more dots than others. The pattern is roughly rectangular, with the dots concentrated in the central area. The dots are small and black, and the background is white. The overall effect is a minimalist, geometric composition.

The figure consists of 10 sub-diagrams arranged horizontally, each showing a pattern of black dots on a grid. The patterns evolve from left to right, starting with a small cluster of dots and growing into a more complex, branching structure.

A 4x10 grid of 40 small clusters of black dots. Each cluster is a unique arrangement of dots, ranging from simple pairs to more complex, multi-dot patterns. The patterns are distributed across the grid, with some appearing more frequently than others. The overall effect is a collection of abstract, minimalist shapes.

A 6x10 grid of 60 small clusters of black dots. Each cluster represents a different pattern of dot distribution, ranging from a single dot to a 3x3 square. The patterns are arranged in a grid that is 6 rows high and 10 columns wide.

The image displays a 100x100 grid of dots. The dots are arranged in a pattern that suggests a banded or block-like structure. The main diagonal is densely populated with dots, and there are several off-diagonal blocks of dots, indicating a sparse matrix structure. The overall pattern is symmetric, suggesting a Hermitian or symmetric matrix.

Number of children	Number of families
0	4
1	3
2	5
3	2
4	1
5	1

A 3x3 grid of dots. The dots are located at the following positions (row, column): (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), (3,2), (3,3). The dots are arranged in a sparse pattern, with some cells empty.

The image displays a 10x10 grid of 100 small clusters of black dots. Each cluster is a unique arrangement of dots, varying in shape and size. The clusters are arranged in a regular grid, with each cluster occupying a square cell. The patterns range from small groups of 2-4 dots to larger, more complex arrangements of up to 10 dots. The overall effect is a dense, textured field of small, distinct shapes.

A 5x10 grid of dots forming the letters 'L', 'A', 'M', 'A', 'S' in a stylized font. The letters are composed of black dots on a white background. The 'L' is formed by a vertical column of 5 dots and a horizontal row of 4 dots at the bottom. The 'A' is formed by two vertical columns of 4 dots each, with a horizontal row of 2 dots in the middle. The 'M' is formed by two vertical columns of 4 dots each, with a horizontal row of 2 dots in the middle. The 'A' is formed by two vertical columns of 4 dots each, with a horizontal row of 2 dots in the middle. The 'S' is formed by a vertical column of 4 dots, a horizontal row of 4 dots, and a vertical column of 4 dots.

A 3x3 grid of dots. The top row has three dots. The middle row has two dots, with the rightmost position empty. The bottom row has two dots, with the leftmost position empty.
