

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in a 10x10 grid. The first column shows the 10 possible combinations of the first 9 digits, and the second column shows the 10 possible combinations of the last 9 digits. The remaining 80 patterns are the combinations of these two sets, forming a complete binary space for 10 digits.
