

A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the background is white. The pattern is roughly rectangular, with the dots concentrated in the center and fewer dots towards the edges. The dots are arranged in a way that suggests a random or semi-random distribution, with some clusters and some empty spaces. The overall appearance is that of a noisy or sparse data set.

The image displays a 100x100 grid of dots. Each dot in the grid is replaced by a small, complex cluster of dots, creating a dense, fractal-like pattern. The clusters vary in size and shape, often forming cross-like or star-like structures. The overall effect is a highly detailed, self-similar pattern that fills the entire grid.
