

The image displays a 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, suggesting a grid with many missing dots. The pattern is denser in some areas and sparser in others, with some rows having more dots than others. The dots are arranged in a way that suggests a grid, but with many missing dots, creating a fragmented appearance. The pattern is denser in some areas and sparser in others, with some rows having more dots than others.

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot in the bottom-left position is missing, leaving a gap.

The image displays a 15x15 grid of black dots on a white background. The dots are arranged in a pattern that suggests a banded structure, with higher density along the main diagonal and some off-diagonal elements, particularly in the lower-left and upper-right quadrants. The overall appearance is that of a sparse matrix visualization, where the positions of the dots represent non-zero entries in a matrix.

Figure 1 shows a 2x5 grid of dot patterns. The top row contains five patterns of dots, and the bottom row contains five patterns of dots. The patterns are arranged in a way that suggests a sequence or a transformation.
