

[illegible]

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in a grid where the first column represents the first digit, the second column the second digit, and so on, up to the tenth column representing the tenth digit. Each row represents a unique 10-bit binary number from 0000000000 to 1000000000.

[illegible]

A 3x3 grid of dots. The top row has two dots, the middle row has two dots, and the bottom row has two dots. The dot in the top-right position is missing.

The image displays a 10x10 grid of 100 small square plots. Each plot contains a unique arrangement of black dots on a white background. The dots are organized into various patterns, including horizontal lines, vertical lines, clusters, and more complex, irregular shapes. The density and distribution of dots vary significantly across the different plots, illustrating a wide range of possible dot configurations.
