A large grid of 100 rows and 100 columns of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with many cells being empty. The dots are small and black, and the background is white. The pattern of dots is not uniform, with some areas having more dots than others, and some dots appearing in isolated positions. The overall effect is a complex, abstract arrangement of points.

A 3x3 grid of dots forming a triangle. The top row has 3 dots, the middle row has 2 dots, and the bottom row has 1 dot.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique visual representation of a 10-bit binary string. The patterns are arranged in rows and columns, with each row containing 10 patterns and each column containing 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string.
