

The image displays a 10x10 grid of 100 small clusters of black dots on a white background. Each cluster is a unique arrangement of dots, representing a different number from 0 to 99. The clusters are arranged in rows and columns, with the first row containing clusters for numbers 0-9 and the second row containing clusters for numbers 10-19, and so on. The clusters are arranged in a way that they are easy to distinguish from each other, and they are arranged in a way that they are easy to read.

The image displays a 10x10 grid of 100 small clusters of black dots on a white background. Each cluster is a unique arrangement of dots, representing a different number from 0 to 99. The clusters are organized into rows and columns, with the first row containing clusters for numbers 0-9, the second row for 10-19, and so on, up to the tenth row for 90-99. The clusters are arranged in a way that is visually appealing and easy to read.

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first two rows show numbers 0-9, the next two rows show 10-19, and so on, up to 90-99 in the last two rows. Each cluster is a unique arrangement of dots, with some numbers having a single dot and others having up to 10 dots.

A 3x10 grid of dots representing a sparse matrix. The dots are arranged in a pattern that suggests a banded structure with some off-diagonal elements.
