

[illegible]

A 10x10 grid of 100 small dot patterns. Each pattern is a 5x5 arrangement of dots, where the presence or absence of a dot at a specific position represents a binary digit (0 or 1). The patterns are arranged in rows and columns, with each row and column containing 10 unique patterns. The patterns are generated by a simple algorithm, resulting in a diverse set of visual representations for each of the 100 possible combinations of 10 binary digits.
