

A 10x10 grid of 100 small clusters of black dots, each cluster representing a different number from 0 to 99. The clusters are arranged in a grid where the first row shows numbers 0-9, the second row 10-19, and so on, up to the tenth row showing 90-99. Each cluster is a unique pattern of dots, with the number of dots corresponding to the number it represents. For example, the cluster for '0' has 0 dots, '1' has 1 dot, '2' has 2 dots, and so on, up to '99' which has 99 dots.

A 20x20 grid of black dots on a white background. The dots are arranged in a sparse, irregular pattern, with some rows having more dots than others. The dots are small and black, and the grid is composed of 20 rows and 20 columns. The pattern of dots is not uniform, with some areas being more densely populated than others. The dots are scattered across the grid, with some appearing in small clusters and others in isolation. The overall effect is a random, noisy distribution of points.
