

The image displays a 16x16 grid of 256 small clusters of black dots on a white background. Each cluster is a unique arrangement of dots, representing a specific 16-bit binary code. The clusters are organized into four groups of four rows each, with each group containing a different number of dots per cluster (1, 2, 3, or 4). The clusters are arranged in a way that they can be read as a sequence of 16-bit binary codes, where each cluster represents a unique 16-bit binary code. The clusters are arranged in a way that they can be read as a sequence of 16-bit binary codes, where each cluster represents a unique 16-bit binary code.
