The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid within each cell. The patterns are generated by a process that iterates through all possible combinations of 10 bits, ensuring that every possible pattern is represented exactly once. The patterns are arranged in a grid that is 10 rows high and 10 columns wide, with each row and column containing a different set of patterns. The patterns are arranged in a grid that is 10 rows high and 10 columns wide, with each row and column containing a different set of patterns. The patterns are arranged in a grid that is 10 rows high and 10 columns wide, with each row and column containing a different set of patterns.

A 3x3 grid of dots representing the number 3 in Braille. The dots are arranged as follows: Row 1: dots 2, 5, 6; Row 2: dots 2, 5; Row 3: dots 1, 2, 5.
