

A 10x10 grid of 100 small dot patterns. Each pattern is a 5x5 arrangement of dots, where each dot is either present (black) or absent (white), representing a binary digit. The patterns are arranged in 10 rows and 10 columns, with each row and column containing a unique set of patterns. The patterns are small and sparse, with varying numbers of dots per pattern. The overall layout is a square grid with a white background and black dots.

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s). The patterns are arranged in a grid where the first column represents the first digit, the second column the second digit, and so on, up to the tenth column representing the tenth digit. Each row represents a unique 10-bit binary number from 0000000000 to 1000000000.
