

This image displays a 10x10 grid of 100 rows and 100 columns of Braille characters. Each cell in the grid contains a unique Braille pattern, totaling 10,000 distinct characters. The patterns are arranged in a systematic, grid-like fashion, with each row and column containing a sequence of these unique Braille cells. The characters are rendered in black dots on a white background, following the standard Braille cell structure of six dots in a 2x3 arrangement.
