

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique combination of 10 binary digits (0s and 1s), arranged in a 2x5 grid of dots. The patterns are organized into four groups of 25, corresponding to the four 4-bit inputs (00, 01, 10, 11) of a 10-input, 1-output logic function. The patterns are arranged in a way that allows for easy identification of the input combinations and the resulting output values.

A 3x10 grid of dots representing a sparse matrix. The dots are arranged in a pattern that suggests a banded structure with some off-diagonal elements.
