

The image displays a 16x16 grid of black dots on a white background. The dots are arranged in a pattern that suggests a banded or block-like structure, with some non-zero entries scattered throughout the grid. The pattern is symmetric about the main diagonal, which is represented by a series of dots from the top-left to the bottom-right. There are also clusters of dots along the diagonals and in the corners, indicating a sparse matrix structure.

A 3x3 grid of dots. The dots are located at the following positions (row, column): (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), (3,2), (3,3). The dots are arranged in a sparse pattern, with some cells empty.
