

The image displays a 10x10 grid of 100 small dot patterns. Each pattern is a unique visual representation of a 10-bit binary string. The patterns are arranged in 10 rows and 10 columns, with each row containing 10 patterns and each column containing 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string. The patterns are arranged in a grid where each row contains 10 patterns and each column contains 10 patterns. The patterns are generated by a random process, resulting in a diverse set of visual representations for each 10-bit binary string.

A 10x10 grid of 100 small clusters of black dots on a white background. Each cluster is a random arrangement of dots, with some having 2 dots, some 3, some 4, and some 5 dots. The clusters are arranged in a grid where the first column has 10 clusters, the second has 9, and so on, down to the tenth column which has 1 cluster.
